JUNCHEN (JC) XIONG

New York City, NY 10027 | (617) 710-7916 | jcxiong8956@gmail.com | linkedin.com/in/jcxiong0809

Data scientist with 2 YOE building and deploying production ML systems for consumer credit and lending, spanning gradient-boosted risk models, LLM-based transaction decoding, and the data infrastructure behind them. Ships end-to-end: feature pipelines, model training and validation, and the serving and monitoring layers that keep models accurate for multi-region clients. Python, SQL, AWS.

PROFESSIONAL EXPERIENCE

Concord Advice, LLC/Bankuity (Fintech / Alternative Data Credit Modeling) **New York City, NY**
Data Scientist, Model Developments & Analytics Unit *Aug 2025 – Present*

- Architected a containerized KPI pipeline and Streamlit dashboard for two clients across 2 regions, designing modular SQL extraction layers (origination, servicing, collections) via Azure Blob and resolved production OOMs.
- Engineered Canadian market features (domestic lenders, bilingual benefits, regional processors) for 3x the generic model's test-set lift while enriching our transaction knowledge base, helping the client swap out defaulting approvals to recover +$200,000/month.
- Engineered the accuracy report gating a new NER model behind internal Redis merchant-to-category knowledge base, proving +30% loan capture, -32.6% transfer noise, clearing a labeling upgrade 2 client loan books now underwrite on.

Columbia University Graduate School of Arts and Sciences (Environmental Prediction Modeling) **New York City, NY**
Graduate Research Assistant – Hybrid Machine Learning Air Pollution Modeling (Advisor: Prof. Mike Z. He) *Jan 2025 – Sep 2025*

- Delivered an interpretable, residual-explaining XGBoost model refining NO_2 predictions at 200 m^2 resolution (spatial R^2 0.84) plus a hybrid Isolation Forest anomaly system cutting misclassification 30% in the ozone data pipeline.

New York State Energy Research and Development Authority (NYSERDA) (Forecasting & Model Development) **New York City, NY**
Energy Markets Analyst Intern, Policy, Analysis, & Research Unit *Feb 2024 – Dec 2024*

- Accelerated energy market queries by 45+ minutes with PySpark forecasting pipelines on AWS (EC2, S3, Redshift), adding schema validation, partitioning, and KNN imputation to the power-market data layer.
- Improved grid load forecasting 20% (<100 MW) over OLS baselines using Gradient Boosting with GridSearchCV, and delivered 10+ Power BI dashboards raising reporting efficiency 70% for analysts and policymakers.

PROJECTS AND RESEARCH

Bankuity Go-to-Market LLM Pipeline (Ideal Customer Profile & GPT Labeling) **New York City, NY**
Data Scientist, Forward-Deployed to Client GTM Team *Feb 2026 – Present*

- Built an automated GTM pipeline for Bankuity's rental product, using schema-constrained GPT labeling to classify +100 property-manager prospects against ICP criteria at 78% agreement with a hand-labeled golden set.
- Forward-deployed into the client's CRM, designing the prompt-and-verify loop (enrichment, dedupe, GPT field verification) that cut manual prospect research from 12 to 1 hours and now drives outbound to property managers for 5 client's BD associates.

Urban Greenspace Computer Vision Project (PyTorch Computer Vision CNN Training) **New York City, NY**
Graduate Research Assistant (Advisor: Pablo Knobel, PhD, Icahn School of Medicine at Mount Sinai) *May 2025 – Present*

- Architected a TensorFlow/Keras multihead CNN pipeline automating urban greenspace ratings from 512×512 satellite imagery, onboarding an 8-member research group and establishing a scalable path to process 8M+ images.

EDUCATION

Columbia University, Graduate School of Arts and Sciences **New York City, NY**
M.A. Quantitative Methods in the Social Sciences – Data Science Track *Sep 2023 – Feb 2025*
Top 5% (GPA: 3.98/4.0); 1st Place, Environmental Track, Columbia Data Science Society Datathon

Boston University, Questrom School of Business **Boston, MA**
B.S. Business Administration – Management Information Systems & Business Analytics; *Minor:* Mathematics *Sep 2019 – May 2023*
Magna Cum Laude (GPA: 3.82/4.0); Dean's List 7 of 8 semesters

TECHNICAL SKILLS

- **Languages & Databases:** Python (pandas, NumPy, scikit-learn), SQL, R, Redis, MongoDB, PostgreSQL
- **LLM & NLP:** Prompt engineering, LLM fine-tuning, multi-model consensus, named entity recognition, evaluation & accuracy labeling
- **Data & Cloud Engineering:** AWS (EC2, S3, Glue, Redshift), GCP (BigQuery), Databricks, PySpark, Docker, Git, Azure DevOps
- **Visualization:** Power BI (DAX), Tableau, Qlik
- **Certifications:** Professional Scrum Master I; NASM Certified Personal Trainer
